

Artifact Questionnaire

During the reproducibility workshop at SIGCOMM'17, we discussed on how we could encourage researchers to better share software, datasets and other information that can help to replicate or reproduce research results that are described in our conference papers. This is in line with the ACM policy on artifact review and badging <https://www.acm.org/publications/policies/artifact-review-badging> that CCR tries to promote.

One of the nice suggestions that was made during the workshop was to write a CCR editorial for SIGCOMM, CoNEXT and IMC 2017 that summarize the artifacts that are associated with each published paper. Such an editorial would contain one or two paragraphs that briefly describe the artifacts of the papers published.

* Required

Paper title *

Your answer
